

FUJI-FORMOST ATTACHLESS INFEED SYSTEM

Quality is "First and Formost"

FW-3710BSB Top Seal Wrapper

MAINTAINS PRODUCT QUALITY

GENTLE PRODUCT HANDLING

QUICK, SIMPLE CHANGEOVER

EASY TO CLEAN CONVEYORS

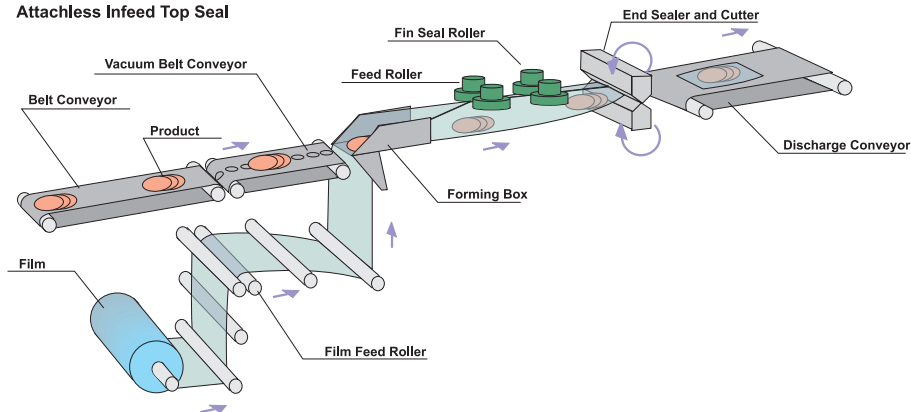

UP TO 120 PPM

POSITIVE FEEDING OF SOFT, STICKY PRODUCTS

The Fuji-Formost Attachless Infeed System is specially designed to handle soft or sticky products that are impossible to wrap with lug chain systems. A flat conveyor belt transfers the product to the wrapper. The belt can be easily cleaned and removed.

The system allows for wide variations in product cut-off length. Product position is sensed and timed to the wrapper. The Attachless Infeed System connects to Fuji-Formost Horizontal Servo Wrappers to provide a package of the best quality and appearance. The system is compatible with both bottom seal and top seal wrappers.

PACKAGING PROCESS Attachless Infeed Top Seal
