FORMOST FUJI

APPLICATION:

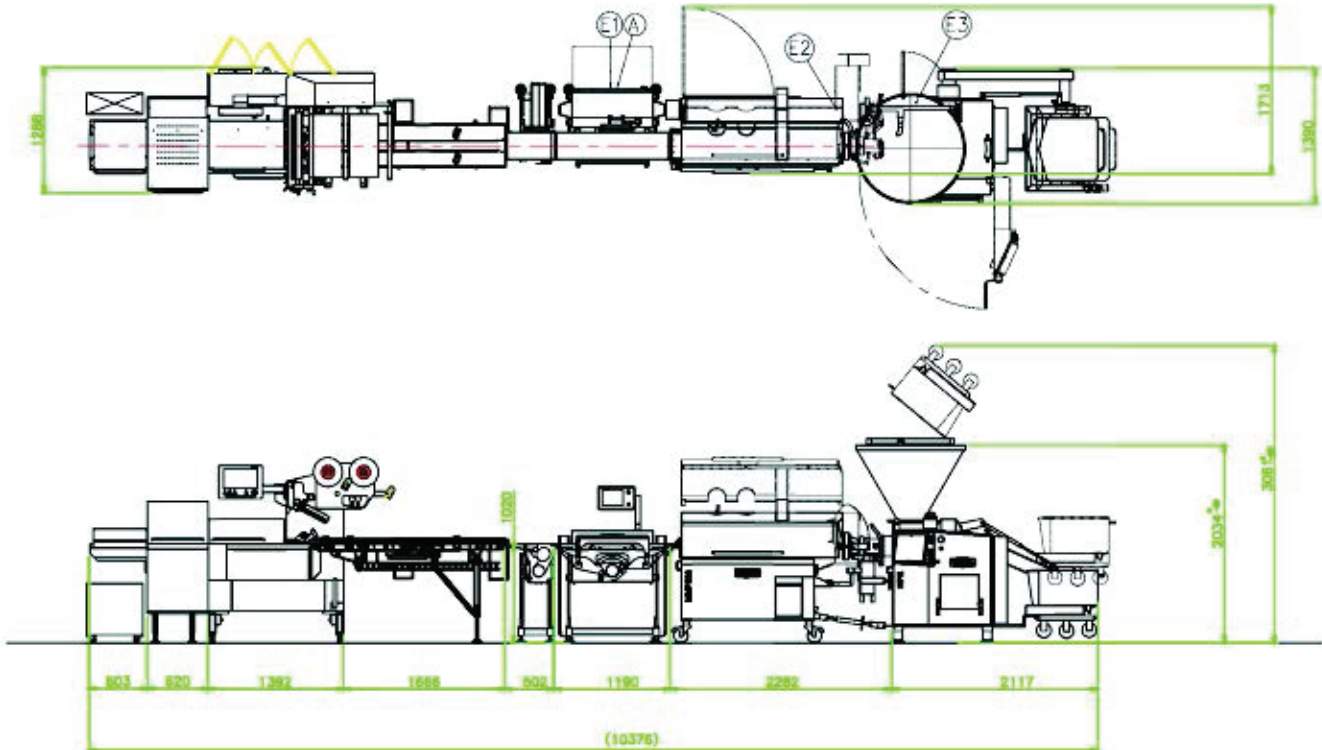

In developing efforts to create a more sustainable package, we are able to eliminate up to 60% of the additional contents that go along with your standard ground meat packaging. Material such as metal clips, foam, plastic, and/or cardboard trays are no longer needed to provide an attractive, cost effective, and space saving package. With 50% less space on a truck, the system provides 100% increase in shipping capabilities, storage, and valuable shelf space.

Reduce the unnecessary packaging such as foam, plastic, and clips

Introducing a clean, fresh, eco-friendly packaging option for ground meat

Wrapper layout with Reiser Vemag
