

GET IN TOUCH WITH RELIABILITY

SEALING QUALITY

Mechanical simplicity with advanced design provides proven seal quality with a wide range of sealing options available.

SWING ARM ROTARY OPTION

Increased dwell time and sealing quality at high speeds. Easily changes between swing arm and standard rotary end seals.

HIGH SPEED BOX MOTION OPTION

Innovative Breakthrough in horizontal packaging, ideal for hard to seal films. Capable of packaging speeds up to 400 ppm the high speed box motion wrapper boasts high efficiency, tight wrapping, low vibration and direct drive servos.

SANITARY DESIGN OPTION

Easy Tool Free Disassembly of the Infeed Conveyor provides for thorough sanitation. Built to meet 3A standards with superior design for better runoff and less harborage.

ALPHA 8

Horizontal Form Fill Seal Machine

Located in Woodinville Washington, our employees, machines, and operations have helped position Formost Fuji as a leading designer and innovator in the packaging machine industry worldwide.

For over 50 years, Formost Fuji has developed strong customer loyalty through our commitment to complete customer satisfaction. That is why "Quality is First and Formost"

FEATURES:

EASY FILM CHANGE / REDUCED FILM ROUTE

Formost FUJI developed an open-close film feed roller frame. In this frame, the compression rubber roller can be opened and allows for easier film change. Now film change and sensor cleaning can be done simply and quickly. A non-contact optic sensor replaces the limit switch for detection of film run out. Formost FUJI has also reduced the film route distance which saves wasted film during set-run.

The Alpha 8 Wrapper is easier to use through the auto-calculation function and by improvements to the operation panel. Once the user enters the basic information such as product size and scale value, the Alpha 8 wrapper automatically detects product for rejection. No complicated settings or adjustments are necessary.

ENERGY SAVING

The Alpha 8 Wrapper is designed with induction heating in the center seals which provides heat stability with less energy usage. Heating only where it is needed, when it is needed.

TILT DOWN FIN SEAL

By operating a lever, the center fin seal unit can tilt down without a tool. Providing easy access for sanitation and maintenance.
