BDS FEATURES:

SERVO DRIVEN OVERHEAD

GENTLE PRODUCT HANDLING

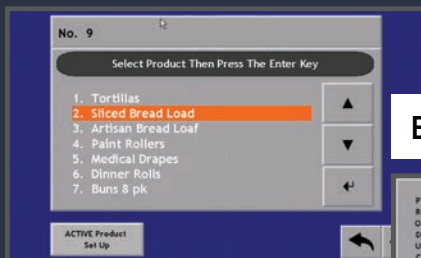

Newly designed servo driven overhead provides a quieter, smoother and more efficient operation.

Pneumatic hold down fingers that are independently controlled by the PLC allow for adjustments from the HMI.

Servo driven infeed and discharge conveyors with dial indicators for precise adjustments.

Torque limiting safety switch automatically shuts off the bagger if resistance on the upper pusher head is too high.

The easy to operate HMI panel is on a rotating arm that allows for access from the front and back of the machine.

EASY TO OPERATE HMI PANEL

NEWLY DESIGN TIMING BELT

Our Company: **Formost Fuji Corporation** is committed to providing high-quality packaging equipment across various industries. As a world leader in form-fill-seal flow wrap, and horizontal bagging machines, we constantly innovate to deliver cutting-edge solutions for our customers. We recognize that you have many options for equipment, which is why we strive to be more than just a vendor; we are your partner, offering support from design to daily operations for years to come.
